Our home elevators can be fitted virtually anywhere in a home. Free design consultation and estimate.

ACCESS ELEVATOR
Jamestown, NY 14701
716-483-3696 • www.accesslevator.com

The PVE30 is the smallest home elevator in the world. It is safe to say that the PVE30 is the smallest home elevator in the world, but by no means should one underestimate its capabilities. The PVE30 elevator has a 300lb. (136kg) lift capacity and is capable of up to 50 ft. (15m) of rise even as many as five stories. With a 30 inch outside diameter (size footprint), there are very few homes that do not have the space to accommodate the PVE30 single passenger residential elevator.

Rather than requiring a large elevator shaft, the self-contained home elevator made of polycarbonate and aluminum, rests on the existing ground floor and provides a beautiful panoramic view as you travel from floor to floor within the home.

The PVE30 has quickly found its place as the ultimate space-saving solution for a home elevator. In the event that you need a personal home lift but do not have the ability to accommodate the PVE32 (wheelchair accessible) or PVE37 vacuum elevator models (both larger diameter models), the PVE30 is absolutely the answer for your home elevator.

Stiltz Residential Elevators

Our home elevators can be fitted virtually anywhere in a two-story home thanks to their small footprints, drive mechanisms and dual rail technology. This means Stiltz residential elevators have an unrivaled ability to fit into spaces other elevator lifts cannot with minimal building work and disruption. We offer a complete residential elevator solution to suit most needs including the Stiltz Deco Home Elevator and Stiltz Riko Home Elevator and a standard Install can take one day.

Contact our Jamestown office located at 1209 East 2nd St, at 716-483-3696 for free design consultation and review of existing projects from stair chairs to wheelchair lifts to complete residential and light commercial elevators that have been designed and installed by Access Elevator & Lift. See our latest elevator installed at the United Church Of Christ.

SUMMER CLASSES WITH KAYE LINDAUER
Courses offered through Special Studies (fee)
Daily Participants Welcome (space available basis)

Week one: The Virgin Mary in Western Art
This historical overview of images of Mary will be coupled with commentary on art. What influence have artists had over the years in the popularity and understandings of Mary? Reminders on how theology and psychology come together in the study of Mary included.

Week two: (no class on July 4) Interpretation of Fairy Tales
“The Princess and the Twelve Princes of Dancing Shoes” along with other stories will be retold with a commentary influenced by Jungian psychology. Story motifs, presentation of archetypal energies, shadow influences and the individuation process will be emphasized.

Week three: Van Gogh: His Life and Work
Yes, the artist did cut off his ear in a state of madness! Come to know this genius more fully through the retelling of stories of his life and the history of his revolutionary new art.

Week four: Poetic Perspectives on Aging
Poetry, stories, retail with commentary, readings, film clips, etc. will be brought together for a creative look at the joys and challenges of the aging process. (Material covered in 2017 class not included.)

Week five: Emily Dickinson and Carl Jung
The life and poetry of Dickinson will be used to illustrate psychological concepts. Both Jung and Dickinson were interested in the soul and wrote about the full range of human emotions and experiences. They shared a great need for solitude and their work is having an important influence on seniors today.

Week six: Greek Mythology
The stories of Adelanta will be retold with commentary influenced by Jungian psychology. Adelanta was a princess in ancient Greece and must have been the goddess Artemis. Within the myth is the episode of the great Calabrian bear hunt. Famous paintings inspired by the myth included.

Week seven: Swans
“Swans Lore” will be told with excerpts from several books and film. Additional swan stories including “The Children of Lir” will be included along with a review of how poets have metaphorically used the image of the swan to express important ideas.

Week eight: Jungian Psychology
Archetypes, dreams, active imagination, symbols, experiencing the numinous, “The Red Book,” and other topics will be explored. The goal of studying analytical psychology is to become more aware of the complexity of the human psyche.

Week nine: Cinema and Psyche
The most successful films speak to the archetypal nature of being human. Film excerpts will be used to explore basic concepts of depth psychology.

Registration begins later in the spring, date to be announced.
